

key	intent	Description
gateway_sts	gateway status/SYSTEM STATUS	
gateway.powerStatus	POWER STATUS	
gateway.systemStatus	Health Status	
system_status.statusbox_main s_on	MAINS STATUS/Power Supply Status	
statusbox_network	Network /Network Status	if statusbox_network exists if not empty Status = On Operator = Network Name else Status = Off Operator = "-"
statusbox_network /system_status.statusbox_network	Operator /Network Operator	
statusbox_sos_status	SOS Status	
System_status.statusbox_no _of_connected_device / statusbox_no_of_connected_ device	Devices Connected /Connected Devices	
Statusbox_battery_reverse && statusbox_battery_low	Battery Status	if Battery Low and Battery Reverse Status = Low & Reverse else if Battery Reverse Status = Reverse else if Battery Low Status = Low else Status = OK
battery_voltage	Battery Voltage Status	

system_current	Current Status/System Current Status	
ac_voltage	AC Voltage Status	
cctv.powerStatus	CCTV Status / CCTV Power Status	
cctv.healthStatus	Camera Status	
systemStatus	Camera Link Status	<pre> if valid systemStatus if Normal / Online / Active Status = Online else Status = Offline else Status = N/A </pre>
hddStatus	HDD Status	
cctv_sts	cctv status/cctv heart beat	
cctv_sts	Cctv system status	
<pre> const hddInfo = data["rock.HddINFO"]; let totalCapacity = 0; for (const hdd of hddInfo) { totalCapacity += parseFloat(hdd.HDDCapacity); } console.log(totalCapacity); </pre>	Cctv storage status	
<pre> const count = rock.VIDEOdDETAILS.length; console.log(count); </pre>	Total Camera	
rock.HddINFO.forEach(hdd => {	HDD Information	

<pre> console.log(hdd.HDDSlot, hdd.HDDStatus, hdd.HDDCapacity, hdd.HDDFreeSpace); }); </pre>		
<pre> rock.Time Rock.dexter_date rock.syncTimeDate rock.deviceType Rock.manufacturer Rock.model rock.serialNumber rock.firmwareVersion rock.mfDate </pre>	Cctv about device	
rock.Time	System Time	
rock.dexter_date	System Date	
rock.syncTimeDate	Last Sync. Date & Time	
rock.deviceType	Device Type	
rock.manufacturer	Device Make /manufacturar	
rock.model	Device Model	
rock.serialNumber	Device Serial Number / Serial Number	
rock.firmwareVersion	Firmware Version	
rock.mfDate	MF Date /Manufacturar date	
<pre> rock.CAMERAdetails.forEach(c amera => { console.log(`\${camera.channel_no} \${camera["Channel Name"]} \${camera.manufacturer} \${camera.model} \${camera.serialNumber} \${camera.resolution} </pre>	Camera Information	

<pre> \${camera.fps} \${camera["IP Address"]} \${camera.status} \${camera.TotalBytes}`); }); </pre>		
<pre> rock.VIDEOdETAILS.forEach((ca mera, index) => { console.log(`\${index + 1}   \${camera.cameraName}   \${camera.cameraIP}   \${camera.start_time}   \${camera.end_time}   \${camera.total_duration} days`); }); </pre>	NVR Recording Information/ Recording information	
<pre> rock.SdRecINFO.forEach((camer a) => { console.log(`\${camera.channel_no}   \${camera.channel_name}   \${camera.cameraIP}   \${camera.start_time}   \${camera.end_time}   \${camera.total_recording_days} days`); }); </pre>	SD Recording Information	
cameraTamperCount	Cctv camera tamper count	
cameraDisconnectCount	Cctv camera disconnect count	

<pre>let errorCount = 0; rock.HddINFO.forEach(hdd => { if (hdd.HDDStatus.toLowerCase() === "error") { errorCount++; } }); console.log(errorCount);</pre>	Cctv hdd error count	
ias.powerStatus	las power status/integrated alarm system power status	
ias.systemStatus	las system status
